## Education

◆ 2006-2021  
Woodbine Gardenia  
School, Kalyanpur,  
Kanpur, Uttar Pradesh -  
208026

◆ 2022-2026  
Btech. CSE (Data  
Science)  
JSS Academy of  
Technical Education,  
Noida - 201301

## Contributions

◆ *Hacktoberfest 2022*  
Made a YouTube web  
app template which  
fetches video data from  
the API and renders as  
grid format

## Projects

### Covid-19 Telegram Bot

Approx. 9000 users (during Covid 19).

- Bot that notifies people when a vaccine slot is vacant or available in the city and helps to book it
- Made using Python, Firestore database, etc.

### Book Bot

- It is a telegram bot that sends you the desired book you want
- It uses Web Scraping to scrape books
- Made using Python

### Random Dog Generator

- It is a Web app that generates random dog images.
- Made using Python Flask
- Uses - API calls, local database

### Guess the number

- It is a Web app in which the user has to guess a number
- Made using Python Flask

## Language Skill

- Python
- C/C++
- Java
- HTML/CSS/JS
